## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC §101***

Claims 1-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter.

In the present case, the claims recite an abstract idea. The recited steps of establishing a value threshold, establishing a transaction, comparing the transaction value to the threshold and managing an aspect of the procurement process do not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of how to manage at least one aspect of a procurement process.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, dependent claim 2 and independent claim 18 include selecting a supplier (i.e., useful and tangible). Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not

Art Unit: 3627

within the technological arts as explained above, the claims are deemed to be directed to non-statutory subject matter.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukushima et al., US Patent number 5,799,289 (hereinafter 289).

289 teaches an order management system and method considering budget limit. Specifically, 289 teaches an order limit (e.g. column 5; lines 30-31) and a budget (e.g. column 5; lines 55-56). Examiner notes that both of these items represent a value threshold. 289 further teaches an orderer inputs information an item to be ordered, an amount and a delivery date (e.g. column 6; lines 34-38). Examiner notes that this represents establishing a transaction, with an associated value.

289 also teaches when the summed cost of the ordered supplies exceeds the budget, the collection process unit send an error message to the users terminal unit (column 7; lines 34-37). Examiner notes that this represents comparing the transaction value with said value threshold and managing at least one aspect of the procurement process in response to comparison. Examiner further notes that the above teachings further includes performing a supplier selection process and notifying a purchaser to document a supplier selection process characteristic.

Art Unit: 3627

289 further teaches supplier priority basis (e.g. column 6; line 40). Examiner notes that this represents establishing a supplier selection guideline and comparing documentation with guideline.
